Mobile Data Capture Cart

The Mobile Data Capture Cart is a versatile, stand-alone unit that can be customized to fit your application. Now you can bring mobility to functions like: Check-In/Check-Out, Triggered Print and Apply, Cycle Counting, Dock Door Portals, Barcode scanning, RFID tag verification and serialization. The Mobile Data Capture Cart flexibly integrates with your current manufacturing configuration. Position the unit where you need it—at a production line, dock door or critical process station—when the task is complete, move the unit to the next location where that function is required. This product also offers both Ethernet and wireless connectivity to facilitate seamless integration into your current network.

Mobile Cycle Counting Cart, shown here with optional vision system.

Popular Deployments

- ▶ Inventory Cycle Counting
- ▶ Check-In/ Check-Out
- ▶ Triggered Print and Apply
- ▶ Mobile Portal Station

Rechargeable 12V Battery Powered - AC Hookup for Charging
Windows Operating System
USB 2.0 Port
Ethernet Port
NEMA Enclosure
Touch Screen Interface
Pneumatic Tires for All Types of Surfaces
37.5" H x 30" W x 22" D

Optional Hardware/Software

- ▶ Barcode Scanners and Readers
- ▶ Dock Portals
- ▶ Triggered print and Apply System
- ▶ RFID reader
- ▶ RFID antennas—power 1W (900 MHz) up to 4W (13.56 MHz)
- ▶ Software
- ▶ Interface screen
- ▶ Photo recognition (Vision System)
- ▶ RFID frequencies 900 MHz (UHF) or 13.56 MHz (HF) RFID are available
- ▶ Supports all current standards including UHF Gen2, EPC GTIN coding standards
- ▶ Printers
